

ACTEWAGL DISTRIBUTION SCHEDULE OF ELECTRICITY NETWORK CHARGES 2016-17.

The following charges will apply from 1 July 2016. Accounts issued on or after this date will be charged on a pro-rata basis.

The charges contained in this schedule will be payable to ActewAGL Distribution:

- for, or in connection with, the use of the electricity network;
- for the provision of metering equipment, meter reading and data forwarding; and
- · for miscellaneous services.

Also included in this schedule are the arrangements for the reimbursement to retailers under the ACT Government's *Electricity Feed-in (Renewable Energy Premium) Act 2008* as well as the treatment of energy from small photovoltaic systems that are not covered by the ACT Government's scheme.

Prices include Goods and Services Tax of 10 per cent where stated.

Use of network charges

Code	Description	2016-17 GST-exclusive rate	2016-17 GST-inclusive rate
010	Residential Basic Network		
	The Residential Basic Network charge shall be:		
	a network access charge per day	33.285c	36.614c
	• all energy consumption	6.902c per kWh	7.592c per kWh
011	Residential Basic Network XMC		
	The Residential Basic Network XMC charge shall be:		
	a network access charge per day	25.641c	28.205c
	• all energy consumption	6.902c per kWh	7.592c per kWh
015	Residential TOU Network		
	The Residential TOU Network charge shall be:		
	a network access charge per day	33.285c	36.614c
	for energy consumption at max times (as defined)	11.937c per kWh	13.131c per kWh
	 for energy consumption at mid times (as defined) 	5.766c per kWh	6.343c per kWh
	 for energy consumption at economy times (as defined) 	2.608c per kWh	2.869c per kWh

Code	Description	2016-17 GST-exclusive rate	2016-17 GST-inclusive rate
016	Residential TOU Network XMC		
	The Residential TOU Network XMC charge shall be:		
	a network access charge per day	25.641c	28.205c
	for energy consumption at max times (as defined)	11.937c per kWh	13.131c per kWh
	 for energy consumption at mid times (as defined) 	5.766c per kWh	6.343c per kWh
	for energy consumption at economy times (as defined)	2.608c per kWh	2.869c per kWh
020	Residential 5000 Network		
	The Residential 5000 Network charge shall be:		
	• a network access charge per day	54.805c	60.286c
	 energy consumption for the first 60 kWh per day (pro-rata over billing period) 	5.360c per kWh	5.896c per kWh
	 energy consumption above 60 kWh per day 	6.902c per kWh	7.592c per kWh
021	Residential 5000 Network XMC		
	The Residential 5000 Network XMC charge shall be:		
	• a network access charge per day	47.161c	51.877c
	 energy consumption for the first 60 kWh per day (pro-rata over billing period) 	5.360c per kWh	5.896c per kWh
	 energy consumption above 60 kWh per day 	6.902c per kWh	7.592c per kWh
030	Residential with Heat Pump Network		
	The Residential with Heat Pump Network charge shall be:		
	a network access charge per day	98.149c	107.964c
	 energy consumption for the first 165 kWh per day (pro-rata over billing period) 	3.888c per kWh	4.277c per kWh
	 energy consumption above 165 kWh per day 	6.902c per kWh	7.592c per kWh

Code	Description	2016-17 GST-exclusive rate	2016-17 GST-inclusive rate		
031	Residential with Heat Pump Network XMC				
	The Residential with Heat Pump Network XMC charge shall be:				
	a network access charge per day	90.505c	99.556c		
	 energy consumption for the first 165 kWh per day (pro-rata over billing period) 	3.888c per kWh	4.277c per kWh

XMC Tariffs

XMC network tariffs exclude metering capital charges. These network tariffs will be applied to new connections that have paid for their metering assets. These new tariffs ensure that ActewAGL Distribution and Retailers will be able to clearly identify, through the network billing system, which customers have paid for their meters and are therefore not liable for the metering capital charge. The application of the charges is summarised in the table below.

TYPE OF CUSTOMER	Pays ActewAGL metering capital charge	Eligible for XMC tariffs	Pays ActewAGL metering non-capital charges
Existing connection at 30 June 2015, ActewAGL provides metering service.	Yes	No	Yes
Existing connection at 30 June 2015, switches to another metering provider.	Yes	No	No
Existing connection at 30 June 2015, pays for new meter for PV system, ActewAGL provides metering service.	Yes	No	Yes
Existing connection at 30 June 2015 pays for new meter for PV system, later switches to another metering provider.	Yes	No	No
New connection (from 1 July 2015) pays for new meter, ActewAGL provides metering service.	No	Yes	Yes
New connection (from 1 July 2015) pays for new meter, switches to another metering provider.	No	Yes	No

Use of network charge

The local distributor charges for the use of the transmission and distribution networks. Both networks are natural monopolies, and therefore the local distributor must operate in a completely open and transparent way with respect to these charges.

The use of network charges are published from time to time and all retailers that operate in the jurisdiction covered by ActewAGL Distribution's network pay identical rates.

The network charges above include transmission and distribution use of system components as well as the cost of jurisdictional schemes and, in most cases, meter capital costs.

The **transmission use of system** component is paid to the operator of the transmission system. It covers the use of the network from the generator to the distributor's bulk supply point.

The **distribution use of system** component covers the use of the distributor's network from the bulk supply point to the customer's point of connection.

The **jurisdictional scheme** cost component covers the cost of the ACT feed-in tariff and ACT government taxes, fees and charges.

The **metering capital** cost component covers the capital cost of meters provided by ActewAGL Distribution to customers.

These charges are subject to independent regulation. They are determined, as far as possible, to be cost reflective. ActewAGL has established a number of different network rates.

Separate charges apply for the recovery of metering non-capital cost including meter reading and data forwarding.

Application of rates

The network charge applicable to each installation shall be in accordance with the following classification of premises, places and purposes.

The **Residential Basic Network** charge shall be applicable to installations at private dwellings, (excluding serviced apartments), but including the following.

- · living quarters for members and staff of religious orders
- living quarters on farms
- · charitable homes
- retirement villages
- · residential sections of nursing homes and hospitals
- residential sections of boarding schools and educational institutions
- churches, buildings or premises which are used principally for public worship
- approved caravan sites.

Serviced apartments are premises which from time to time are available for hire for accommodation for periods that may be less than one month and where services available to the apartments include the provision and laundering of bed linen.

In respect of multiple dwellings of three or more dwelling units, the Residential Basic Network charge will be applicable only where each dwelling unit is separately metered and the account is in the name of the occupant.

When a portion of premises is used principally for domestic purposes, loads not exceeding five kilowatts, which are used for purposes other than domestic use, may be supplied at the Residential Basic Network charge. For this purpose, the loading of equipment shall be taken to be:

- for permanently connected equipment, the actual rating of the equipment;
- for light fittings, 60 watts per light fitting;
- · for plug sockets:
- sockets rated 10 amperes or 10 amperes per phase: 500 watts or 500 watts per phase
- sockets rated other than 10 amperes: the wattage rating shall be taken as 50 times the current rating of the socket.

The **Residential TOU Network charge** is available only to customers eligible for the Residential Basic Network charge with a meter able to be read as a time-of-use meter and to recharge facilities for electric vehicles on residential premises. Consumers on this tariff with a meter with two elements providing separate time-of-use consumption data from each element may have the time-of-use charges applied separately to each register.

The **Residential 5000 Network charge** is available only to customers eligible for the Residential Basic Network charge. Customers are ineligible to apply for this charge if they have been on this charge in the previous 12 months and have since been supplied energy at the Residential Basic Network charge, the Residential TOU Network charge or the Residential with Heat Pump Network charge to that premises.

The Residential with Heat Pump Network charge is available only to customers eligible for the Residential Basic Network charge and who have installed a fixed operational electric appliance which incorporates a mechanical refrigeration unit and a fan or fans, arranged so that the evaporator and the condenser can be switched to heat or cool air blown through the appliance (heat pump). Customers are ineligible to apply for this charge if they have been on this charge in the previous 12 months and have since been supplied energy at the Residential Basic Network charge, the Residential TOU Network charge or Residential 5000 Network charge to that premises.

The **General Network charge** is available to customers where no other defined charge, except for an off-peak network charge, is utilised, and shall include:

- installations on farms which are not living quarters and have loads exceeding five kilowatts (as defined above)
- nursing homes and hospitals, excluding residential sections
- boarding schools and educational institutions, excluding residential sections
- motels, hotels, serviced apartments and any form of accommodation used to house temporary residents for periods of less than one month at caravan parks or other temporary accommodation sites
- · shops, offices, warehouses, factories, professional rooms
- social or sporting club facilities not used for domestic accommodation.

Off-peak charges are available only to customers utilising a controlled load element, taking all other energy at Residential Basic Network, Residential TOU Network or General Network rates. These charges are not available where the customer's meter is read as an interval meter.

The Off-Peak (1) Night Network charge shall provide operation for a minimum of six hours and a maximum of eight hours within any one day, between 2200 hours (10.00pm) and 0700 hours (7.00am).

This off-peak charge is applicable to

- · recharging electric vehicles,
- · compressing natural gas for CNG vehicles,
- water heating storage units where electricity is used to supplement other forms of energy (for example, solar hot water), and
- permanent heat (or cold) storage installations of a design and rating acceptable to ActewAGL, which absorb their major energy during restricted times, but which may be boosted at the principal charge at other times.

The Off-Peak (3) Day & Night Network charge shall provide operation for a total of 13 hours in any one day. The said 13 hours shall be comprised of eight hours between 2200 hours (10.00pm) and 0700 hours (7.00am) and five hours between 0900 hours (9.00am) and 1700 hours (5.00pm). The off-peak charges are applicable to permanent heat (or cold) storage installations of a design and rating acceptable to ActewAGL, which absorb their major energy during restricted times, but which may be boosted at the principal charge at other times.

The Off Peak (3) Day & Night Network charge is applicable to:

- water heating storage units for which a test certificate has been issued indicating compliance with Australian Standard 1056 and having lower or upper and lower elements but with any upper element connected to the principal charge (rated delivery shall be not less than 160 litres)
- water heating storage units where electricity is used to supplement other forms of energy (for example, solar hot water)
- storage space heating or cooling including under-floor, concrete-slab heating systems
- swimming or spa pool heating, and associated auxiliaries, but not to spa baths.

ActewAGL will nominate the time settings for Off Peak 1 & 3 charges.

The **Streetlighting Network** charge shall be applicable to the night-time lighting of streets and public ways and places.

Time of use, time of use demand network and time of use capacity charges. The customer must make available all necessary equipment together with adequate accommodation for the installation and proper maintenance of the installation, all to the satisfaction of ActewAGL.

The **low voltage time of use capacity** charge is to be applied to all non-residential customers with a generator, other than a stand-by generator, connected on the customer's side of the meter. This charge is available to all low voltage customers.

The **high voltage time of use demand** charges may be available to customers connected at a nominal voltage not less than 11,000 volts.

The Small Unmetered Loads Network charge shall be applicable to eligible installations less than 1,000 Watts, as determined by ActewAGL, including:

- telephone boxes
- · telecommunication devices
- other as determined by the National Metrology Coordinator.

Consumption charges are calculated based on the assessed rating of the load and the charge period.

Streetlighting is excluded. Please refer to the Streetlighting Network charge above.

Internal Network charges are available only to ActewAGL Distribution sites.

Time periods

- Business times are defined as from 0700 hours (7.00am) to 1700 hours (5.00pm) on weekdays.
- Evening times are defined as from 1700 hours (5.00pm) to 2200 hours (10.00pm) on weekdays.
- · Off-Peak times are defined as all other times.

Weekdays are Monday to Friday.

- Max times are defined as from 0700 hours (7.00am) to 0900 hours (9.00am) and from 1700 hours (5.00pm) to 2000 hours (8.00pm) every day.
- Mid times are defined as from 0900 hours (9.00am) to 1700 hours (5.00pm) and from 2000 hours (8.00pm) to 2200 hours (10.00pm) every day.
- · Economy times are defined as all other times.

Standard time zone

No change is made for Daylight Savings Time. All times referred to are in Australian Eastern Standard Time.

Network access charges

Network access charges shall be applied per connection point (unless otherwise specified) and applied daily. The network access charge excludes metering charges.

Maximum demand charges

Maximum demand charges shall be applied per connection point (unless otherwise specified) and calculated on the basis of a daily rate for the maximum demand in a billing period. The maximum demand is the highest demand calculated coincident over a 30-minute clocked interval during the billing period.

Capacity charges

Capacity charges shall be applied on the same basis as maximum demand charges and calculated on a daily rate for the maximum demand recorded over the previous 13 months inclusive of the current billing month. The maximum demand is the highest demand calculated coincident over a 30-minute clocked interval over the relevant period.

Loss factors

AL00 1.0508 for supply at low voltageAH00 1.0190 for supply at high voltage

Renewable Energy Generation

If a customer has a grid-connected renewable energy generator with a net metering facility and the customer is not receiving the ACT feed-in tariff, the following arrangements shall apply to PV installations:

- The customer shall pay the published network charge for energy imported from ActewAGL Distribution's network (based upon the customer's meter reading).
- ActewAGL Distribution will pay to the customer's retailer an amount equal to ActewAGL Distribution's estimated avoided cost of Transmission Use of System (TUOS) charges on energy exported into the electricity network (based upon the customer's meter reading).
- The customer shall continue to pay the network access charge.

This arrangement is available only to customers with less than 30 kilowatts installed capacity of renewable generation with a net metering facility able to record energy imported and exported into the electricity network.

The estimated avoided cost of TUOS charges on energy exported into the electricity network is 0.5 cents per kWh.

Customers with a grid-connected renewable energy generator which was connected on or before 30 June 2013 may continue with the existing arrangements applicable to that customer.

In all other circumstances where a customer has a grid-connected renewable energy generator with an installed capacity of less than 30 kilowatts, including where the customer is receiving the ACT feed-in tariff, the following arrangements shall apply:

- The customer shall pay the published network charge for the gross amount of energy imported from ActewAGL Distribution's network.
- ActewAGL Distribution shall not charge the customer for the use of the network for the energy exported.
- The customer shall continue to pay the network access charge.

"Energy exported" means energy generated by a photovoltaic system that results in energy flowing from the customer's premises into the electricity network.

The following are the payments (negative charges) under the ActewAGL Distribution's Renewable Energy Generation arrangements together with the tariff codes applied to those payments.

These payments are made to your retailer.

Code	Description	2016-17 GST-exclusive	2016-17 GST-inclusive
		rate	rate
GENR	Gross connected renewable	As per	
	energy generation (See explanation above)	applicable tariff	
1999	Net connected renewable	-0.5 c per kWh	-0.55 c per kWh
	energy generation (see explanation above)		(when applicable)

Metering charges

Charges for metering capital costs are shown below in Codes MP 7 to MP 10 and are included in the use of network charges, where applicable. Additional charges for the provision of metering, meter reading and data forwarding also apply. ActewAGL will provide ACT metering services for customers using manually-read interval meters (MRIM or Type 5), accumulation and time-of-use meters (BASIC or Type 6) and un-metered connections (UMCP or Type 7). The non-capital charges for those services are listed below in Codes MP 1 to MP 6.

Code	Description	2016-17 GST-exclusive rate	
MP1	Quarterly basic metering non-c	apital rate	
	The quarterly basic metering non-capital rate applies to all accumulation and time-of-use meters read quarterly

Schedule of Connection charges

The following charges are payable to ActewAGL Distribution for or in connection with the use of the electricity system. These charges apply to work on standard residential and similar installations carried out in normal business hours, unless otherwise stated. Charges for work of greater complexity or outside these hours will be determined individually.

After hours charges, where applicable, apply to services performed outside normal business hours. This applies to all services requested after 1400 hours (2.00pm) on working weekdays where the services are to be performed prior to normal business hours on the next working weekday.

Normal business hours: 0800 hours (8.00 am) to 1600 hours (4.00 pm) on working weekdays.

After hours: All other times.

ACT Government's Electricity Feed-in Renewable Energy Generation scheme

The following are the payments (negative charges) under the ACT Government Electricity Feed-in (Renewable Energy) Act 2008 together with the tariff codes applied to those payments. These rates apply from 1 July 2016.

2016-17

2016-17

These payments are made to your retailer.

	•	for energy consumption at off-peak times (as defined)	1.563c per kWh	1.719c per kWh
	•	all renewable energy generated	-29.07c per kWh	-31.98c per kWh

1005 LV TOU kVA Demand Network with Feed-in tariff code 304

(for customers with interval gross metering, refer to application of rates calculation methodology) the LVTOU Demand Network charge with Feed-in scheme network rate for renewable energy generators greater than 30kW but at 75% will be up to 30kW will be:

•	a network access charge per connection point per day	158.962c	174.858c
•	for maximum demand in a billing period, a charge per day of	42.329c per kVA	46.562c per kVA
•	for energy consumption at business times (as defined)	6.527c per kWh	7.180c per kWh
•	for energy consumption at evening times (as defined)	3.482c per kWh	3.830c per kWh
•	for energy consumption at off-peak times (as defined)	1.563c per kWh	1.719c per kWh
•	all renewable energy generated	-24.96c per kWh	-27.46c per kWh

1006 LV TOU kVA Demand Network with Feed-in tariff code 302

(for customers with interval gross metering, refer to application of rates calculation methodology) the LVTOU Demand Network charge with Feed-in scheme network rate for renewable energy generators up to 30kW will be:

_	•		
•	a network access charge per connection point per day	158.962c	174.858c
•	for maximum demand in a billing period, a charge per day of	42.329c per kVA	46.562c per kVA
•	for energy consumption at business times (as defined)	6.527c per kWh	7.180c per kWh
•	for energy consumption at evening times (as defined)	3.482c per kWh	3.830c per kWh
•	for energy consumption at off-peak times (as defined)	1.563c per kWh	1.719c per kWh
•	all renewable energy generated	-40.50c per kWh	-44.55c per kWh

Application of rates

ACT Government's Electricity Feed-in Renewable Energy Generation scheme (FiT scheme)

Where a retailer has paid an occupier of a premises in accordance with subsection 6(3) of the *Electricity Feed-in (Renewable Energy Premium) Act 2008*, ActewAGL Distribution will reimburse the retailer in accordance with subsection 6(2) of that Act. ActewAGL Distribution's NUOS invoices for retailers will show the reimbursement as a negative amount in the charges.

Retailers are to apply to ActewAGL Distribution for a network tariff code if a relevant network tariff code is not listed above.

Calculation methodology for Feed-in tariffs with interval meters

The tariff codes above starting with 2 or 3 will be applied with the normal tariff for that NMI, e.g. if existing NMI network tariff code is 010, then this site will now have 010 + 201 etc.

For other tariff codes starting with 4 or 6 to 10, the feed-in tariff code above starting with 2 or 3 that is to be applied along with the calculation methodology for that tariff code with interval metering data.

The network charge applicable to each installation with interval meters shall be in accordance with the following:

- 1. for customers with interval gross metering;
 - calculation shall be as per existing standard for kVA demand charges, that is 30 minute clocked interval calculated coincident (where applicable)
 - data stream for energy from the grid, calculation shall be E streams only applied to energy times for kWh rates
 - data stream for energy to the grid, calculation for Feed-in shall be B stream only.

e.g. NMI Network Tariff Code 401, E streams total accumulation = 3000kWh, B stream = 1000kWh

3000 x 10.729c per kWh = \$321.87 1000 x -44.85c per kWh = -\$448.50.
